DETAILED ACTION

This application is a 371 of PCT/US04/24387 08/18/2004 which claims benefit of 60/496,537 08/20/2003. Claims 1-14 are before the Examiner and subject to the following Election/Restrictions.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-11, drawn to compounds of formula I wherein Y = S and R5 is H.

Group 2, claim(s) 1-11, drawn to compounds of formula I wherein Y = S and R5 forms a bond with X.

Group 3, claim(s) 1-11, drawn to compounds of formula I wherein Y containing ring is a pyridine and R5 is H.

Group 4, claim(s) 1-11, drawn to compounds of formula I wherein Y containing ring is a pyridine and R5 forms a bond with X.

Group 5, claim(s) 12, drawn to composition containing compound of Group 1 and a GLP-compound.

Group 6, claim(s) 12, drawn to composition containing compound of Group 2 and a GLP-compound.

Group 7, claim(s) 12, drawn to composition containing compound of Group 3 and a GLP-compound.

Group 8, claim(s) 12, drawn to composition containing compound of Group 4 and a GLP-compound.

Group 9, claim(s) 13, drawn to composition containing compound of Group 1 and the GLP-compound Val8-Glu22-GLP-1(7-37)OH.

Group 10, claim(s) 13, drawn to composition containing compound of Group 2 and GLP-compound Val8-Glu22-GLP-1(7-37)OH.

Group 11, claim(s) 13, drawn to composition containing compound of Group 3 and GLP-compound Val8-Glu22-GLP-1(7-37)OH.

Group 12, claim(s) 13, drawn to composition containing compound of Group 4 and GLP-compound Val8-Glu22-GLP-1(7-37)OH.

Group 13, claim(s) 14, drawn to composition containing compound of Group 1 and an MC4 agonist peptide.

Group 14, claim(s) 14, drawn to composition containing compound of Group 2 and an MC4 agonist peptide.

Group 15, claim(s) 14, drawn to composition containing compound of Group 3 and an MC4 agonist peptide.

Group 16, claim(s) 14, drawn to composition containing compound of Group 4 and an MC4 agonist peptide.

The inventions listed as Groups 1-16 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature in all the group is the compound with the invariant butadiene moiety. This can not be a contribution because this structural moiety is found in many chemicals such as benzene.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required; because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) **identification of the claims encompassing the elected invention.**

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or

species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nizal S. Chandrakumar whose telephone number is 571-272-6202. The examiner can normally be reached on 8.30 am - 5 pm Monday- Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on 571-272-0867 or Primary Examiner D. Margaret Seaman can be reached at 571-272-0694. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
